MOOC Basics of Adaptive Learning

One of the key trends in education is adaptive learning. This data-driven approach to teaching zooms in on the individual students and their personal needs providing adapted learning pathways, content and instruction.

Key Information

Start: October 30, 2023

Course

About this Course

This MOOC offers you an opportunity to acquire a high level of knowledge on adaptive learning systems, learning analytics, and didactic aspects of adaptive instructional design. The course also gives insight into future developments of this pedagogical approach to instruction that is able to provide a personalised learning experience in blended and online environments.

At the end of the course, you will be able

- to analyse and evaluate adaptive learning environments for your personal or institutional needs;
- understand and reflect on basic approaches to adaptive learning and instruction;
- select appropriate methods and tools for creating adaptive learning environments.

Mode of Study
