

The Fernfachhochschule Schweiz (FFHS) offers part-time Bachelor's, Master's and continuing education programmes using the blended learning method. For our currently over 2,500 students, we employ 130 persons and over 450 (part-time) lecturers. Whether in teaching, research or administration - as a responsible employer, we count on committed employees who are willing to share our vision of studying independent of time and place.

For our German and English Master of Science in Business Administration major Innovation Management of the Department Business & Technology we are looking for a

## Lecturer in Big Data Analytics

### Responsibilities

- Online module development, execution and evaluation (syllabus and online course)
- Creating, evaluating and reflecting online learning activities, online assessments and exams using online tools and methods
- Supporting students and interacting with them actively on Moodle® to achieve the learning objectives (e-moderation, e-coach) and observing the learning progress of the students
- Close collaboration with the head of study programme

### We expect

- Master's degree (MSc, M.A.) from a University or Swiss Federal Institute of Technology; PhD is of advantage
- Profound Knowledge and 3+ years of global work or research experience in applying advanced analytics and with technologies and techniques to analyse data sets for business decisions
